e-learning module

ODME

OIL DISCHARGE MONITORING EQUIPMENT

The module provides the users with a better understanding of MARPOL Annex I and the handling of oil-contaminated water originating from cargo/ballast operations on oil tankers.

In this training programme you will be introduced to the principles and basics of operation of ODME (Oil Discharge Monitoring Equipment). The module provides the users with a better understanding of MARPOL Annex I and the handling of oilcontaminated water originating from cargo/ballast operations on oil tankers.

The module also gives a description on: How to fill in the Oil Record Book, The ODME system flows and a typical tank cleaning process
