e-learning module

Vetting

BACKGROUND AND HISTORY

How do tanker operators ensure that their crew on board the vessels, as well as personnel ashore, are equipped to successfully deal with vettings? The answer is quality training and this e-learning module is part of a vetting e-learning package aiming to fulfil that need on several levels. This e-learning module is the first in a series of four that will introduce the learner to the tanker vetting process on board tanker vessels as well as the implications and consequences of a failed inspection.

Legislation & references

- OCIMF (HVPQ & VIQ)
- CDI (SIR)
- INTERTANKO (TOTS)
- OIL MAJORS (Best Practise Guidelines)

STCW

Operation & Safety

Learning objectives

After completing this e-learning module, the learner will:

- Be familiar with the tanker Vetting process on board tanker vessels
- Understand the implications and consequences of a failed inspection

Duration

60 Minutes

TARGET GROUPS

Deck - Operational
Deck - Support
Engine - Management
Engine - Operational
Engine - Support
Shorebased Personnel

SHIP TYPES

Chemical tankers
Gas Tanker
Oil Tanker
